

Jay R. Vishwakarma

Mobile App Developer | Full Stack Developer

📍 Mumbai, India ✉ vishwakarmajay292@gmail.com ☎ 9372454445 🔗 [in/ jayvishwakarma1206/](https://in.linkedin.com/in/jayvishwakarma1206/)

INTRODUCTION

Flutter Developer with 1.5+ years of experience building production-ready cross-platform mobile applications for enterprise and FinTech domains. Strong expertise in Flutter, Dart, Riverpod, and clean architecture, with hands-on experience in offline-first applications, automated API integration using OpenAPI (Swagger), and OTA updates via Shorebird. Proven ability to deliver scalable, high-performance mobile solutions published on the Google Play Store and Apple App Store, with a focus on maintainability, stability, and real-world business use cases.

SKILLS

- **Programming Languages:** Java, Dart, JavaScript, TypeScript, Python
- **Frameworks:** Flutter, Angular, Express, Spring Boot
- **Backend Frameworks:** Express, Spring Boot**DevOps & CI/CD:** Docker, CI/CD Pipelines
- **State Management & Architecture:** Riverpod, Provider, Clean Architecture, MVVM
- **Database:** MySQL, SQL Server, PostgreSQL, MongoDB
- **Device & Platform Features:** Google Maps SDK, Location Tracking, Geofencing, Push Notifications, Offline Caching
- **Dev Tools:** Git, GitHub, Visual Studio Code, Android Studio, Xcode, Postman, Slack
- **Development & Deployment Practices:** Agile / Scrum, Code Reviews, Debugging & Performance Optimization, App Store & Play Store Deployment, Shorebird

EXPERIENCE

Flutter Developer | **BlackCurreant Labs** | Malad, Mumbai |

Jan 2025 – Present

- Designed, developed, and maintained production-grade cross-platform mobile applications using Flutter and Dart, following clean architecture and modular code practices.
- Implemented structured state management using Riverpod, enabling scalable feature development, improved testability, and long-term maintainability.
- Automated REST API integration using OpenAPI (Swagger) by generating type-safe models and services, reducing manual API errors and development effort.
- Engineered complex navigation flows using nested routing and AutoRoute, supporting multi-role user experiences and deep feature hierarchies.
- Integrated secure and efficient networking using Dio, implementing centralized error handling, request interceptors, and token-based authentication.
- Delivered offline-first functionality using local persistence and sync mechanisms to ensure seamless app usage in low-connectivity environments.
- Implemented Shorebird OTA updates, enabling instant bug fixes and feature enhancements without app store redeployment.
- Ensured app performance, reliability, and production readiness, contributing to successful deployments on Google Play Store and Apple App Store.

PROJECTS

Stulz Service Automation - Flutter, Express, Angular, Sql, Google API's, Firebase. [\[PlayStore\]](#)

- Developed a robust, offline-first Enterprise Service Automation app using Flutter and Drift (SQLite), enabling technicians to manage tickets and sync data seamlessly in low-connectivity environments.
- Architected a scalable solution using Riverpod for state management and Dio for networking, handling complex workflows like dynamic Daily Service Reports (DSR) with digital signatures and rich text inputs.
- Implemented critical field modules including real-time Geolocation tracking, Inventory/Spares management, and Role-Based Access Control to streamline operations for diverse user roles.
- Optimized application performance and maintainability by setting up strict linting rules, generating type-safe code, and integrating Firebase for push notifications and analytics.

Hedged - Flutter, Express, Angular, Sql, Firebase. [\[PlayStore\]](#) , [AppStore](#)

- Managed a high-performance FinTech mobile application using Flutter and Riverpod, enabling retail investors to access real-time trading signals, portfolio tracking, and one-click trade execution through integrations with brokers such as Kotak, Groww, and Upstox.
- Implemented Shorebird for Over-The-Air (OTA) updates, enabling instant deployment of critical bug fixes and logic enhancements directly to users, bypassing lengthy store review cycles.
- Engineered a robust, scalable app architecture utilizing AutoRoute for complex navigation and Dio for secure API communication, supporting critical features like live P&L tracking, interactive dashboards, and rich media educational content.

EDUCATION

Bachelor of Technology in Information Technology

2021 - 2025

Thakur College of Engineering and Technology • Mumbai, India • 8.8 CGPA.
